Hello!

Andy Normington
Embedded Software + Developer Tooling
Focusrite

What's the big idea?

Synergy!

Arghhh!

Working with the garage door up

MICHELIN

- show your working
- don't wait until it's publishable
- let people stumble upon your notebook

Why?

Who cares about my unpolished work?

- catalyse other people's ideas
- save duplicated effort
- feedback you didn't need to ask for
- team docs for free
- more shared context

But...

It's not ready!

I'll look stupid!

xkcd.com/1053/

It might confuse people

Techniques you might want to try

- 'How might we...' docs
- `just` : docs as code you'll keep updated
- Tech radar

Write for yourself first
but leave the garage door up
